quickDocs

Check shipping documents faster and ensure compliance with Artificial Intelligence ✨

Reviewing shipping documents is a slow, error-prone, and manual process. Teams spend hours on checks, and the high risk of oversight due to fatigue or time pressure can lead to delays in document presentation or penalties that impact working capital.
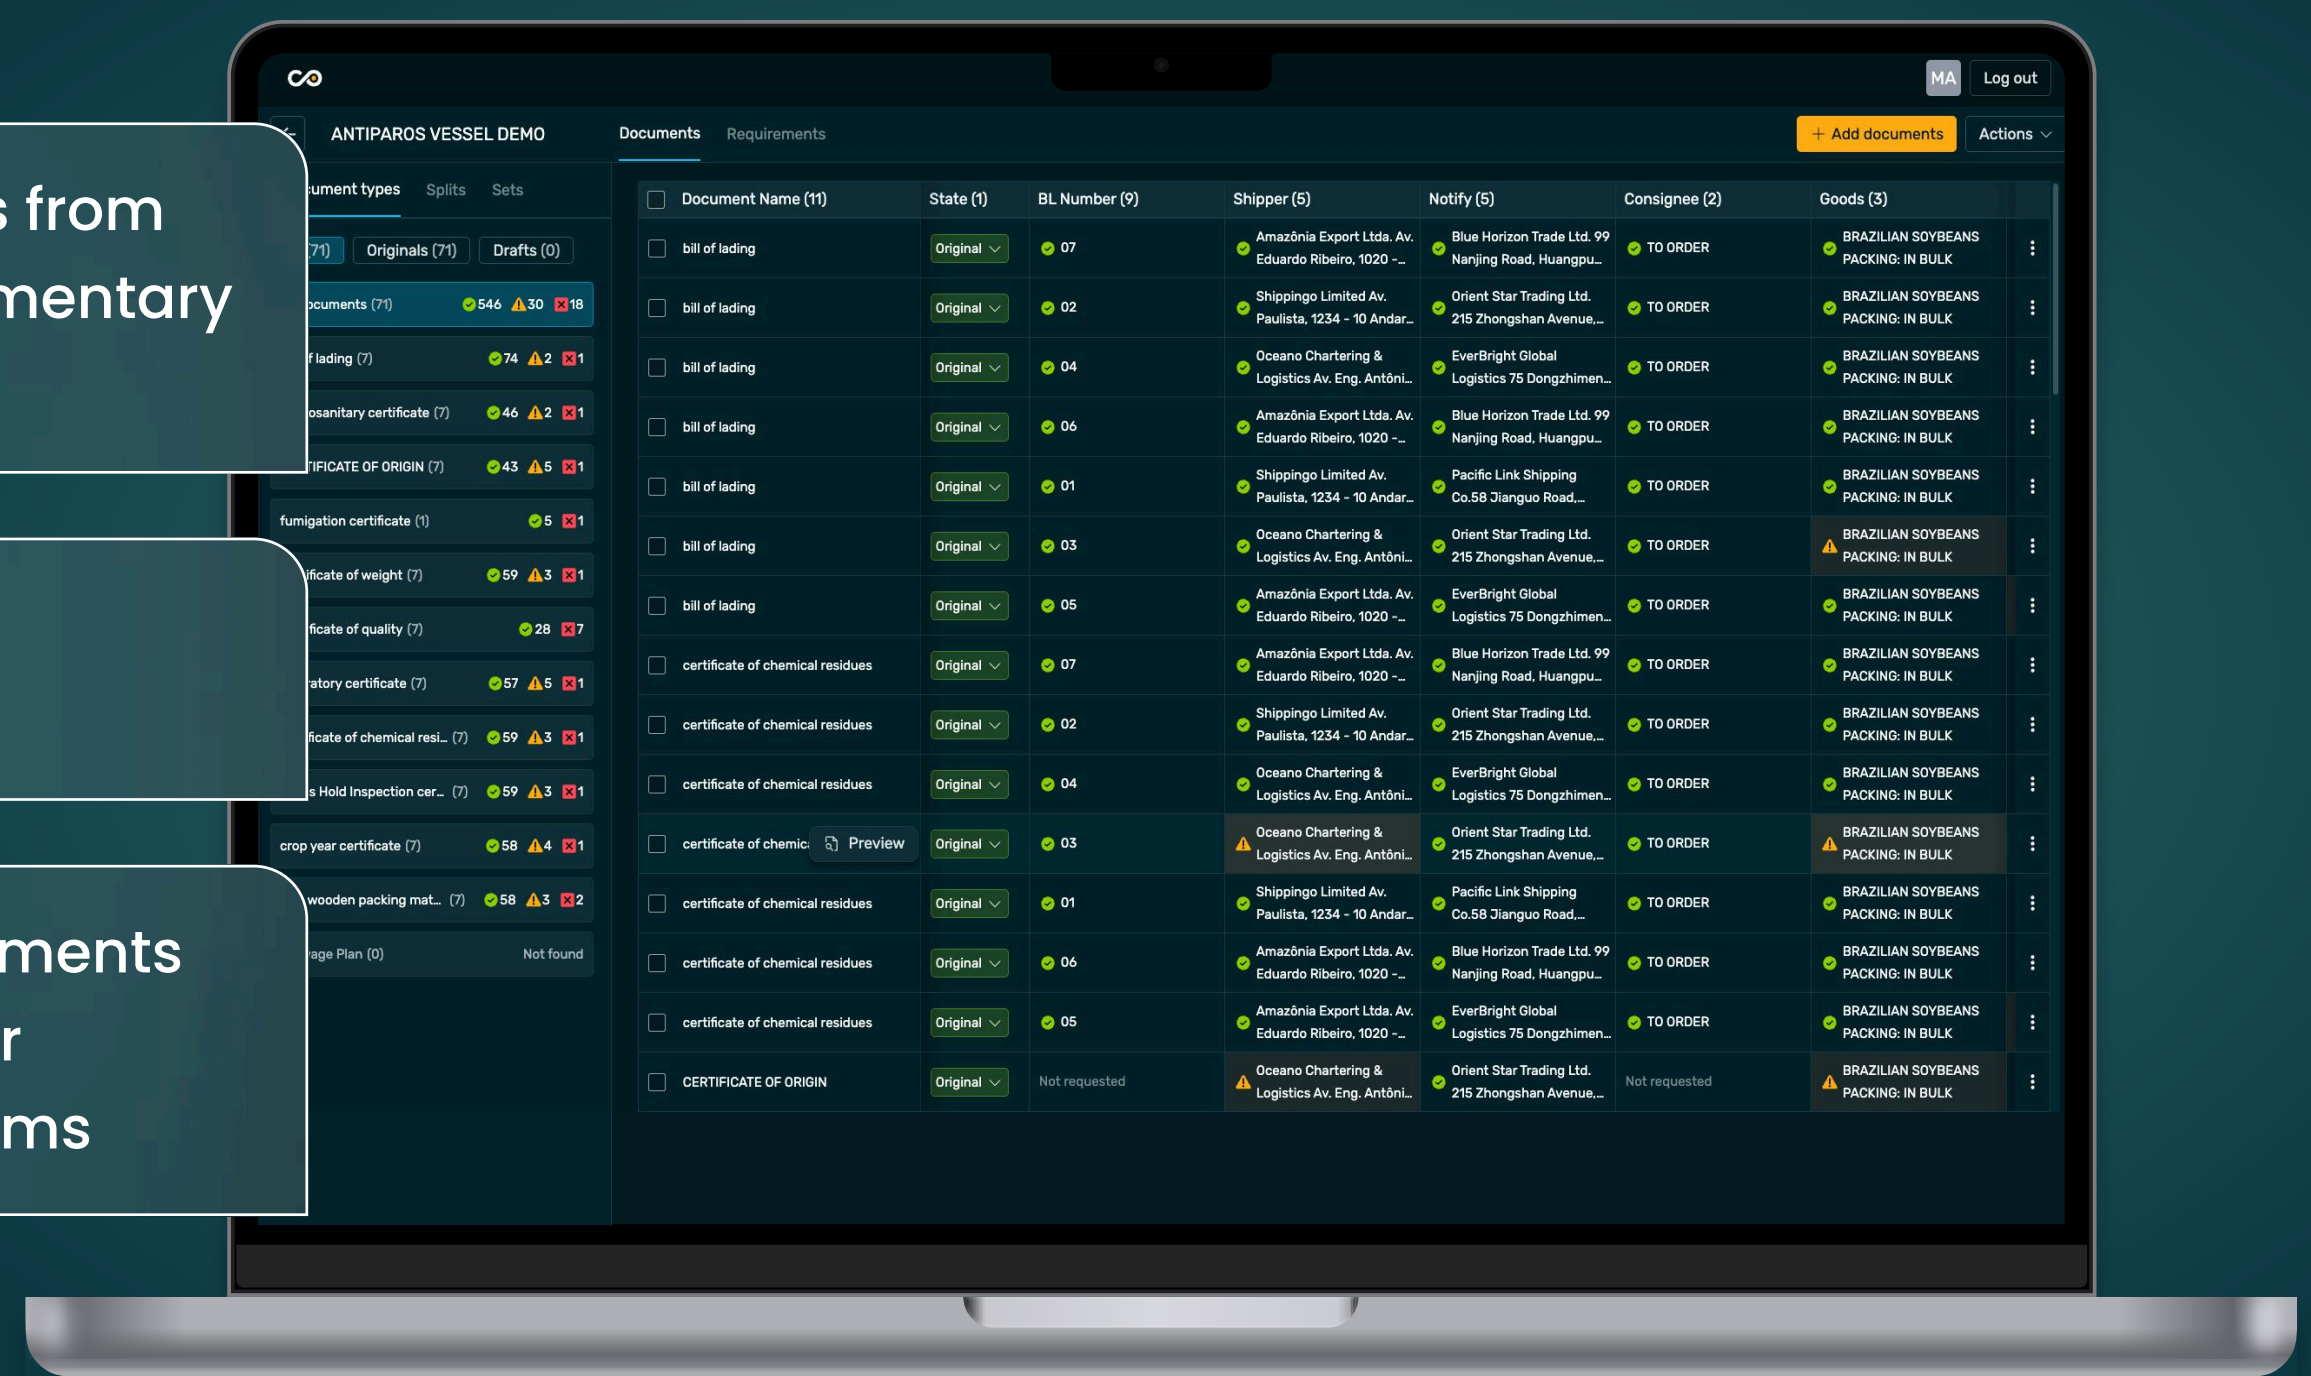

1 Automatically extract requirements from contract, letters of credit and documentary instructions

2 Detects discrepancies between requirements and documents data

3 Logic based checks to ensure documents are compliant with client, country or commodity specific contractual terms

4X faster
Checking of shipping documents.

75% less errors
In the documents presentation process.

Up to 2 days
Saved in the payment cycle.

- **Reduce time to payment** - Decrease the number of times documents need to be reissued and presented again to the bank.
- **Scalable operations** - Ability to process higher volumes of trade without adding headcount
- **Reduce risk** - Avoid contractual penalties and cargoes not being compliant with customer requirements
